This time switch will repeat a pre-set schedule daily except when the **EXTERNAL MANUAL PUSH-BUTTON** is used. This manual button permits the user to turn the water heater **ON** and **OFF ahead** of the schedule. This time switch will resume the *preset* program by the next scheduled **ON** or **OFF** operation. The diagram on the right shows the mechanism and wiring of this time switch. The **TIME-MARK** is used to line up the correct time-of-day on the **TIME-DIAL**. The **ON** and **OFF TRIPPERS** turn the water heater **ON** and **OFF** at the times indicated by their respective position on the **TIME-DIAL**.

● TO SET PROGRAM

1. Grasp time-dial firmly. **PULL** and remove time-dial completely from timer.
2. Remove all **ON** trippers (silver) and **OFF** trippers (brass). Use pencil or paper clip if necessary.
3. Insert **OFF** trippers (brass) in slots for desired **OFF** times, but **NOT CLOSER** than 2 hours apart.
4. Insert **ON** trippers (silver) in slots for desired **ON** times, but **NOT CLOSER** than 2 hours apart. **ON** and **OFF** trippers may be spaced 1/2 hour apart from each other.
5. Replace time dial. **PUSH IN FIRMLY**. If any trippers are near the time-mark, rotate time-dial to avoid interference with mechanism inside.
6. Turn time-dial **CLOCKWISE** one or more revolutions until correct time-of-day is opposite time-mark.

● **TO STOP AUTOMATIC OPERATION** (But without stopping timer) **PULL** outward on time-dial until it clicks.

● **TO RESUME AUTOMATIC OPERATION** **PUSH** inward on time-dial.

● **AFTER POWER FAILURE** (or if water heater was disconnected at main panel) time-dial must be reset to correct time-of-day.
